

DISASSEMBLY AND CARE OF THE EMST150

The only removable part of the trainer is the mouthpiece. The remaining parts of the trainer do not disassemble. Never attempt to take the rest of your EMST150 trainer apart, to remove the mouthpiece from the trainer, pull gently until loosened.

We strongly recommend the trainer's mouth piece be cleaned daily. Since this trainer is for oral use only, warm water and mild soap can be used to rinse the mouthpiece. Do not place in the dishwasher or microwave. Air dry before re-using.

The trainer should not be shared with any other person. Life of the trainer will be based on actual usage and on appropriate cleaning. Harmful cleaning agents such as bleach and ultrasonic cleaning are not recommended. Extreme heat is also harmful to the trainer. Always keep the trainer in a clean place.

Keep trainer and all removable parts away from small children. Small pieces can be swallowed!

Landmine Warfare recounts the use of landmines in the American Civil War from their predecessors before 1861 through
their legacy in the post Cold War era A handful of Confederates pioneered the use of torpedoes as landmines were commonly
called in the 1860s burying them in front of fortifications along roads and as booby traps Federal troops quickly learned how
to deal with them often using Confederate prisoners to dig them up The first doctrine of landmine use in global history
appeared during the Civil War Hess discusses not only the technical and tactical aspects of the Civil War torpedo but the
morality and doctrine that surrounded this weapon in ways that illuminate how modern landmines have shaped international
conflicts to our own time Through intensive research in archival institutions published primary sources and technical
