

## Materials:

- ★ Dissecting tray
- ★ Scalpel, scissors, probes, tweezers
- ★ Pins (some labeled with different colors and numbers, some unlabeled)
- ★ Cat specimen
- ★ Paper towels
- ★ Gloves

## Part 1: Preparing Your Cat

1. Remove your specimen from the plastic bag and discard any of the excess liquid. Place the specimen on the dissecting tray, ventral side up.
2. Using a scalpel, carefully make a Y incision from the superior end of the thoracic cavity to the inferior end of the abdominal cavity and across the appendages, as shown in the diagram to the right. Carefully cut through the skin to reveal the structures underneath.
3. Use pins to secure the skin to the dissecting tray and hold it open for viewing.

## Part 2: Gross Anatomy of the Cat

For this section, be sure to read through all instructions in their entirety. There will be a table for you to fill out at the end of the instructions, so make sure you don't miss that. After class is over, I will come around to check and assign points for the structures you pinned and identified.
