

FRIENDSHIP IN EMERGING ADULTHOOD

compassion and confidence, they also form the most vital source of social support (as cited in Tanner, Arnett & Leis 2009, 49-51). Friendships during emerging adulthood are created due to similarity in age, gender, educational orientation, leisure and media preferences, ethnicity as well as participation in risk behavior. These factors majorly influence the role of friendships in the life of emerging adults. Moreover, the difficulty in obtaining financial independence and competing demands during this period has forced them to postpone their age of marriages and parenthood. During this period, when emerging adults are single and lonely, friends become the central part of their lives because they feel they can share everything with their friends; discuss about close intimate relationships with them since friends can understand them very well; can mirror their thoughts and can also provide invaluable advice when needed (Arnett, 2004). The development of friendship during emerging adulthood is not only limited to friendship but extends to areas of work and intimate relationships. Moreover, the psychological adjustment and well-being of young is majorly affected by friendship during this phase (Tanner, Arnett & Leis 2009, 51).

According to studies done by Samter (2003), emerging adults mainly seek for loyalty, warmth in friendship and someone with whom they can share their personal tales with and therefore, confide in friends for this purpose. Although the number of friends during emerging adulthood is constant similar to adulthood, the time spent with them is not relatively as high as during adulthood. Friendship during emerging adulthood can be between people of same sex as well as opposite sex. According to research, male emerging adults' favorite pastime is participating in shared activities with their male friends whereas female emerging adults prefer spending most of their time talking. In addition, the conversation of males revolves around sports, work and cars while females generally discuss about themselves, their personal problems

House of Commons, 1920 **Moral Emotion, Moral Cognition, and (Im)Moral Behavior in the Workplace** Peixu He, Hongdan Zhao, Cuiling Jiang, Chuangang Shen, 2023-09-27 Moral behavior is subject to socially accepted moral

norms and also has a pervasive influence on organizational performance. With the emergence of ethical issues found in organizations, practitioners and scholars pay increasing attention to ethics management. Therefore, workplace moral behavior, e.g., pro-social behavior and organizational citizenship behavior (OCB) and immoral behavior, e.g., interpersonal abusive behavior, deviant counterproductive behavior, and unethical pro-organizational behavior, have also received substantial research interests over the past decades. To date, the most common framework used to study moral behavior has been the cognitive approach, with abundant evidence demonstrating that emotion and cognition are the two core elements in generating and influencing workplace immoral behavior. However, limited studies have been conducted to explore the emotional cognitive processes or integrative moral emotion cognition system relevant to workplace moral behavior. Despite our knowledge of the antecedents and consequences of workplace immoral behaviors, more research on the generating mechanism, influencing mechanism, transformation mechanism, and governance strategies is needed. For example, it is unclear how exhibiting immoral behavior in the workplace would impact the actor's and the third-party observer's emotions, thoughts, feelings, and subsequent behavior. Besides the question of whether ethical/unethical leader behavior would trigger a trickle-down effect, it is underdeveloped, which refers to the fact that how the behavior or perception of the top leaders affects employees from top to bottom along the formal vertical power chain. In addition, we have little knowledge on when, how, and why the ethical employees, the so-called good soldiers, would engage in workplace immoral behavior and vice versa.
