

EXERCISE 6.1

PAGE NO: 6.2

1. Identify the terms, their coefficients for each of the following expressions:

(i) $7x^2yz - 5xy$

(ii) $x^2 + x + 1$

(iii) $3x^2y^2 - 5x^2y^2z^2 + z^2$

(iv) $9 - ab + bc - ca$

(v) $a/2 + b/2 - ab$

(vi) $0.2x - 0.3xy + 0.5y$

Solution:

(i) $7x^2yz - 5xy$

The given equation has two terms that are:

$7x^2yz$ and $-5xy$

The coefficient of $7x^2yz$ is 7

The coefficient of $-5xy$ is -5

(ii) $x^2 + x + 1$

The given equation has three terms that are:

x^2 , x , 1

The coefficient of x^2 is 1

The coefficient of x is 1

The coefficient of 1 is 1

(iii) $3x^2y^2 - 5x^2y^2z^2 + z^2$

The given equation has three terms that are:

$3x^2y^2$, $-5x^2y^2z^2$ and z^2

The coefficient of $3x^2y^2$ is 3

The coefficient of $-5x^2y^2z^2$ is -5

The coefficient of z^2 is 1

(iv) $9 - ab + bc - ca$

The given equation has four terms that are:

9, $-ab$, bc , $-ca$

The coefficient of 9 is 9

The coefficient of $-ab$ is -1

The coefficient of bc is 1

The coefficient of $-ca$ is -1

Glencoe Mathematics William Collins,1999 **Math Course 2** ,2007 **Key Maths** David Baker,2001 Developed for the EDEXCEL specification this course provides preparation for GCSE success with a practical approach Detailed support and guidance are contained in the Teacher Files on advanced planning points of emphasis key words notes for the non specialist useful supplementary ideas and homework sheets The Twin Film Phenomenon Lauren Rosewarne,2025-11-18 This book examines the recurring phenomenon in film and television where two strikingly similar productions are released in close succession Examples include Armageddon 1998 and Deep Impact 1998 A Bug s Life 1998 and Antz 1998 and more recently the 2019 Fyre Festival documentaries and the 2024 Prince Andrew docudramas Drawing from hundreds of cases this book explores why these twin productions emerge the industrial and creative forces that drive them and how they reflect broader trends in media history Situating this pattern within the fields of remake adaptation and media multiplicities studies this book provides a comprehensive analysis of this largely understudied yet pervasive phenomenon Each chapter examines different motivations behind the creation of twin films and TV shows from economic imperatives and competitive market dynamics to shared cultural anxieties and trends in audience demand This book presents a meticulous catalogue of examples demonstrating how genres and themes gain traction simultaneously across different studios and networks In addition to offering historical insights this book engages with contemporary debates on media repetition nostalgia and Hollywood s fixation on reproducing familiar narratives Written by an author with extensive expertise in media studies this book combines exhaustive research with a clear accessible style making it an essential resource for understanding the mechanisms behind content duplication in the entertainment industry Academically this book contributes to scholarship in film television and media studies by applying an interdisciplinary approach that integrates political science feminist theory and cultural analysis It draws on close readings of films industry reports and a dataset of critical reviews to provide fresh perspectives on media production and consumption As a valuable resource for students and scholars alike it enriches discussions on screen media industrial production and the cultural forces shaping contemporary entertainment **Essential History** Joshua Kates,2005-11-11 However widely and differently Jacques Derrida may be viewed as a foundational French thinker the most basic questions concerning his work still remain unanswered Is Derrida a friend of reason or philosophy or rather the most radical of skeptics Are language related themes writing semiosis his central concern or does he really write about something else And does his thought form a system of its own or does it primarily consist of commentaries on individual texts This book seeks to address these questions by returning to what it claims is essential history the development of Derrida s core thought through his engagement with Husserlian phenomenology Joshua Kates recasts what has come to be known as the Derrida Husserl debate by approaching Derrida s thought historically through its development Based on this developmental work *Essential History* culminates by offering discrete interpretations of Derrida s two book length 1967 texts interpretations that

elucidate the until now largely opaque relation of Derrida's interest in language to his focus on philosophical concerns. A fundamental reinterpretation of Derrida's project and the works for which he is best known. Kates's study fashions a new manner of working with the French thinker that respects the radical singularity of his thought as well as the often different aims of those he reads. Such a view is in fact essential if Derrida studies are to remain a vital field of scholarly inquiry and if the humanities more generally are to have access to a replenishing source of living theoretical concerns.

The Language of Pain. Chryssoula Lascaratou, 2007. How is the universal yet private and subjective experience of pain talked about by different people in everyday encounters? What does the analysis of pain-related lexico-phraseological choices, grammatical structures and linguistic metaphors reveal as to how pain is perceived and experienced? Are pain utterances primarily used to express or to describe this experiential domain? This is the first book that investigates such questions from both a functional and a cognitive perspective. It combines two converging usage-based theoretical models in a systematic linguistic inquiry of the construal of pain in everyday language. This work is based on a specialised electronic corpus of Greek naturally occurring dialogues in a health care context, the underlying assumption being that in the absence of factual evidence, intuition about language cannot reliably detect or predict patterns of usage. Comparing Greek with English data, this book significantly contributes to the development of this research field cross-linguistically.

C.J. Date,2013-05-21 All of today s mainstream database products support the SQL language and relational theory is what SQL is supposed to be based on But are those products truly relational Sadly the answer is no This book shows you what a real relational product would be like and how and why it would be so much better than what s currently available With this unique book you will Learn how to see database systems as programming systems Get a careful precise and detailed definition of the relational model Explore a detailed analysis of SQL from a relational point of view There are literally hundreds of books on relational theory or the SQL language or both But this one is different First nobody is more qualified than Chris Date to write such a book He and Ted Codd inventor of the relational model were colleagues for many years and Chris s involvement with the technology goes back to the time of Codd s first papers in 1969 and 1970 Second most books try to use SQL as a vehicle for teaching relational theory but this book deliberately takes the opposite approach Its primary aim is to teach relational theory as such Then it uses that theory as a vehicle for teaching SQL showing in particular how that theory can help with the practical problem of using SQL correctly and productively Any computer professional who wants to understand what relational systems are all about can benefit from this book No prior knowledge of databases is assumed
