Climate Change and Children's Rights in Zimbabwe Emmanuel Ndhlovu, Clement Chipenda, 2026-02-14 This volume Climate Change and Children's Rights in Zimbabwe Toward Social Policy Based Interventions provides a comprehensive examination of the intersection between climate change and children's rights in Zimbabwe one of the world's most climate vulnerable nations It brings together diverse perspectives from sociology law development studies anthropology economics and environmental sciences to challenge conventional approaches that treat children as passive victims of climate impacts The book interrogates climate vulnerability through multiple dimensions from legal frameworks and theoretical foundations to sectoral impacts and innovative adaptation strategies showcasing transformative pathways for child centred climate action that recognises children as rights holders and active agents of change The book outlines critical aspects and issues that must be understood and addressed to protect and advance children's rights in the face of accelerating environmental change Attention is given to both persistent structural inequalities and innovative opportunities for building resilience through rights based gender transformative and community grounded approaches Through case studies spanning diverse districts including Lupane Bikita Mbire Chivi Mashonaland Central Gutu Goromonzi Zvimba and others it highlights

how climate impacts manifest differently across Zimbabwe's varied ecological and socio-economic landscapes affecting children's health, education, nutrition, protection, and overall well-being. It provides foundational perspectives into climate justice imperatives, multispecies justice frameworks, legal and policy gaps, and opportunities for transformative social policy that centres children's agency and Indigenous knowledge systems. The book is of interest to researchers, climate justice scholars, child rights advocates, development practitioners, humanitarian organisations, and policymakers committed to implementing more effective, equitable, and contextually appropriate climate responses that place children's rights at the centre of all climate action across Zimbabwe and the broader African continent.

[A Military History of the Cold War, 1962-1991](#) Jonathan M. House, 2020-09-24. Study of the Cold War all too often shows us the war that wasn't fought. The reality of course is that many hot conflicts did occur, some with the great powers, weapons, and approval, others without. It is this reality and this period of quasi-war and semiconflict that Jonathan M. House plumbs in *A Military History of the Cold War, 1962-1991*, a complex case study in the Clausewitzian relationship between policy and military force during a time of global upheaval and political realignment. This volume opens a new perspective on three fraught decades of Cold War history, revealing how the realities of time, distance, resources, and military culture often constrained and diverted the inclinations or policies of world leaders. In addition to the Vietnam War and nuclear confrontations between the USSR and the United States, this period saw dozens of regional wars and insurgencies fought throughout Asia, Africa, and Latin America. Cuba, Pakistan, Indonesia, Israel, Egypt, and South Africa pursued their own goals in ways that drew the superpowers into regional disputes. Even clashes ostensibly unrelated to the politics of East-West confrontation, such as the Nigerian Biafran conflict, the Falklands/Malvinas War, and the Indonesian occupation of East Timor, involved armed forces, weapons, and tactics developed for the larger conflict and thus come under House's scrutiny. His study also takes up nontraditional or specialized aspects of the period, including weapons of mass destruction, civil-military relations, civil defense, and control of domestic disorders. The result is a single, integrated survey and analysis of a complex period in geopolitical history which fills a significant gap in our knowledge of the organization, logistics, operations, and tactics involved in conflict throughout the Cold War.

**Disruptive Technologies and Eco-Innovation for Sustainable Development** Akkucuk, Ulas, 2021-09-10. The rise of technology in human culture has changed almost every facet of society. Technology is especially useful regarding sustainable development. These technologies can cause significant greenhouse gas reductions and other benefits in terms of logistics and smart cities. New technology applied in this way can greatly help the human effort to restore the environment. *Disruptive Technologies and Eco-Innovation for Sustainable Development* provides an in-depth look into the new techniques, strategies, and technologies for achieving environmental sustainability through best business and technology practices. The book covers topics such as eco-innovation, green criteria, Agriculture 4.0, and topics related to logic, philosophy, and history of science and technology from the green, sustainable point of view. It is essential for managers, academicians, scientists, students, and
