PC Mag ,2004-05-18 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology *Online Access* ,1995-07 **Hated by All the Right People** Jason Zengerle,2026-01-27 From a seasoned political journalist an eye opening examination of Tucker Carlson s rise through conservative media and politics and his ideological transformation over the past thirty years tracking the concurrent shifts in the political and media landscapes which have both influenced and succumbed to the hyperpartisan politics of today To many Tucker Carlson is synonymous with modern conservative politics Carlson has been present on our screens for almost three decades and is as infamous for his bow tie as he is for his increasingly extreme right wing views But those who knew Carlson in his earlier days in political journalism remember a very different man a serious and gifted writer and commentator who enjoyed debating with liberal friends and calling out conservative failures in equal measure Now after watching Carlson turn away from measured reporting while simultaneously gaining unparalleled power in Donald Trump s Republican Party most are left asking What the hell happened to Tucker New York Times Magazine writer Jason Zengerle s rich and evocative character study of Carlson tells the story of how the former Fox News talking head rose through the ranks of conservative media from his early days as a young writer at The Weekly Standard to his current perch as one of the most powerful voices in right wing politics Through deep reporting and a sweeping view of the political and media landscapes over the past thirty years Zengerle reveals how Carlson s career offers a unique lens into the radical transformation of American conservatism and just as importantly the media that covers and ultimately shapes it As conservative news outlets fight daily over who can report the most disreputable stories and clicks and views take precedence over facts and substance Carlson s evolution tells the larger story of how the right has radicalized and taken the media with it **Diminishing Conflicts in Asia and the Pacific** Edward Aspinall,Robin Jeffrey,Anthony J. Regan,2013 Since the publication of the 2005 Human Security Report scholars and policy makers have debated the causes interpretation and implications of what the report described as a global decline in armed conflict since the end of the Cold War Focusing on the Asia Pacific region this book analyses the causes and patterns of this decline In few regions has the apparent decline in conflict been as dramatic as in the Asia Pacific with annual recorded battle deaths falling in the range of 50 to 75 percent between 1994 and 2004 Drawing on a wide range of case studies this book looks at internal conflicts based on the mobilization of ethnic and nationalist grievances which have been the most costly in human lives over the last decade The book identifies structures norms practices and techniques that have either fuelled or moderated conflicts As such it is an essential read for students and scholars of international relations peace and conflict studies and Asian studies **America the Vulnerable** Joel Brenner,2011-09-29 Now available in a new edition entitled GLASS HOUSES Privacy Secrecy and Cyber Insecurity in a Transparent World A former top level National Security

Agency insider goes behind the headlines to explore America's next great battleground digital security An urgent wake up call that identifies our foes unveils their methods and charts the dire consequences for government business and individuals Shortly after 9/11 Joel Brenner entered the inner sanctum of American espionage first as the inspector general of the National Security Agency then as the head of counterintelligence for the director of national intelligence He saw at close range the battleground on which our adversaries are now attacking us cyberspace We are at the mercy of a new generation of spies who operate remotely from China the Middle East Russia even France among many other places These operatives have already shown their ability to penetrate our power plants steal our latest submarine technology rob our banks and invade the Pentagon's secret communications systems Incidents like the WikiLeaks posting of secret U.S. State Department cables hint at the urgency of this problem but they hardly reveal its extent or its danger Our government and corporations are a glass house all but transparent to our adversaries Counterfeit computer chips have found their way into our fighter aircraft the Chinese stole a new radar system that the navy spent billions to develop our own soldiers used intentionally corrupted thumb drives to download classified intel from laptops in Iraq And much more Dispatches from the corporate world are just as dire In 2008 hackers lifted customer files from the Royal Bank of Scotland and used them to withdraw 9 million in half an hour from ATMs in the United States Britain and Canada If that was a traditional heist it would be counted as one of the largest in history Worldwide corporations lose on average 5 million worth of intellectual property apiece annually and big companies lose many times that The structure and culture of the Internet favor spies over governments and corporations and hackers over privacy and we've done little to alter that balance Brenner draws on his extraordinary background to show how to right this imbalance and bring to cyberspace the freedom accountability and security we expect elsewhere in our lives In America the Vulnerable Brenner offers a chilling and revelatory appraisal of the new faces of war and espionage virtual battles with dangerous implications for government business and all of us
