### To engineers in charge of repair or inspection of our products.

Before repair or inspection, make sure to follow the instructions in this document and Engineers in charge of repair or inspection are made suffering any loss or injury.

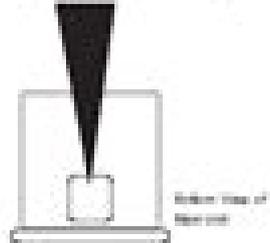

- Use specified parts.**  
 The system uses parts with special safety features against fire and voltage. Use only parts with equivalent characteristics when replacing them.  
 The use of unspecified parts may be regarded as a replacement for which we shall not be liable. The use of product liability (P.L.) shall not be our responsibility in cases where an accident or failure is as a result of unspecified parts being used.
- Place the parts and wiring back in their original positions after replacement or rewiring.  
 For proper circuit construction, use of insulation labels, bonding tape, etc., is advised. The wiring, cables and binding to the parts are specially planned using design to keep away from heated and high voltage parts. Ensure that they are placed back in their original positions after repair or inspection.  
 If electrical damage is caused due to negligence during repair, the legal responsibility shall be with the repairing company.
- Check for safety after repair.  
 Check that the wires, parts and wires are put back securely in their original position after repair. Check for safety before there is no possibility of secondary problems around the repaired parts.  
 If electrical damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.
- Caution in removal and testing wiring connected to the parts for the subunits.  
 Disconnect the battery terminal after turning the ignition key off. If wiring wiring connections are made with the battery reconnected, a short circuit accident may occur. If extensive damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.
- Caution regarding chassis.  
 Do not repair terminal strip board when no attention is paid to the chassis. Always reconnection with care after. (The strip parts include resistors, capacitors, diodes, transistors, etc.) The negative pole of battery reconnection is highly susceptible to heat, so use caution when other replacing them and check the standard alternatives.
- Caution in working flexible parts.  
 Before working with a soldering iron, make sure that the iron tip temperature is about 270°C. Take care not to touch the iron tip repeatedly (more than three times) before using patterns. Also, take care not to apply the tip with force.
- Turn the unit OFF during disassembly and parts replacement.  
 Disconnect all work before you begin work on the unit.
- Caution in checking that the optical pickup lights up.  
 The laser is focused on the disc reflection surface through the lens of the optical pickup. After checking

that the laser pickup (laser light) is, test that more than 100ms elapse from the lens. Prolonged opening of the laser will cause only damage your strength.

- Caution in handling the optical pickup.  
 The laser (405nm) of the optical pickup can be damaged by excessive charge (excess) to your clothes and body. Make sure to avoid excessive charge on your clothes or body, or discharge static electricity before handling the optical pickup.
- Laser class  
 The laser class terminals are checked for temperature in order to prevent electrostatic damage. After replacement, open the chassis cabinet. After removing the PCB from the replacement, start the terminals by soldering them to prevent the damage.
- Caution  
 The chassis has a powerful magnetic circuit. If a magnetic material is put close to it, its characteristics will change. Ensure that no foreign substance enter through the ventilation slots in the cover.
- Checking the lens  
 Dust on the optical lens affects performance. To clean the lens, apply a small amount of isopropyl alcohol to lens paper and wipe the lens gently.

### CAUTIONS

Use of controls, adjustments, or performance of procedures other than those specified herein, may result in hazardous radiation exposure.  
 The compact disc player should not be adjustment or repaired by untrained person, specially qualified service personnel.
