

## DataStage Training

### Module objectives

After this module, you will be able to:

- Install the DataStage Server on Windows NT
- Create a DataStage project
- Install the DataStage clients

The DataStage server should be installed before the DataStage clients are installed. The server can be installed on Windows NT (including Workstation and Server), Windows 2000, or UNIX. This module describes the Windows NT installation.

The exact system requirements depend on your version of DataStage. See the installation CD for the latest system requirements.

To install the server you will need the installation CD and a license for the DataStage server. The license contains the following information:

- Serial number
- Project count
  - The maximum number of projects you can have installed on the server. This includes new projects as well as previously created projects to be upgraded.
- Expiration date
- Authorization code
  - This information must be entered *exactly* as written in the license.
