of a more appealing simpler life closer to nature in contrast to the perceived civilized world that is portrayed as decadent Howell examines archetypes from literature and the popular arts finding examples in Jungian psychology and in contemporary film and television that support the Wild Man image and promote the Simple Life yearning She then looks at the early 20th century conservation and preservation writers as the most direct ancestors of today's environmental movement and an immediate source of inspiration

The Nature of Environmental Stewardship Johnny Wei-Bing Lin, 2016 Environmental issues appear deceptively simple science tells us what the problems are and how to solve them and for Christians the Bible motivates us to care for creation And yet both in society in general as well as in the Christian church in particular we cannot seem to agree on what to do regarding environmental issues In this book climate scientist Johnny Wei Bing Lin argues that determining the content of environmental stewardship far from being a straightforward exercise is a difficult and complex endeavor He sets forth a

general taxonomy drawing from worldviews ethical theories science epistemology science policy studies politics and economics that can help us better understand what excellent creation care consists of and how to bridge the differences people have regarding environmental issues Dr Lin wants peace between folks who are well intentioned but unable to agree be they Christians or not Peace as we wrestle with science and Scripture over our stewardship of God s beloved creation Lin gives us well considered ways to sift competing views and supposed facts This book comes from a master teacher and irenic fellow struggler A very important synthesis of worldview driven informed arguments Terry Morrison Director Emeritus Faculty Ministry InterVarsity Christian Fellowship USA By carefully breaking environmental stewardship down into its component parts this book offers readers a framework to dialogue instead of debate the imperative of creation care Grappling with the fact that today s ecological and economic challenges cannot be contained by a simple ideology nor a single imagination Lin guides us toward both a practical synthesis of collective human wisdom and a higher level of conscientiousness in protecting all that God loves Kaleb Nyquist Steering Committee Member Young Evangelicals for Climate Action Johnny Wei Bing Lin BS and MS Stanford University PhD UCLA was Professor of Physics at North Park University where he remains Affiliate Professor of Physics and Engineering Currently he is Senior Lecturer and Director of Undergraduate Computing Education in the Computing and Software Systems Division at the University of Washington Bothell

Grassroots Stewardship F Stuart Chapin III,2020-06-03 In a society more concerned with how to cope with existential dread than how to make actionable changes to save the planet a surprisingly large number of Americans identify as environmentalists What can individual people do to lessen human impacts on the planet This is not an easy question Most research is focused on large scale changes that go beyond anything an individual can accomplish and people are left feeling defeated rather than inspired to make changes in their everyday lives Change starts at home and F Stuart Chapin III has assembled a book for people who want to learn more about global changes and more importantly what they can do about them starting today Grassroots Stewardship approaches our current situation with an educated sense of hope and positivity This book emphasizes actions by individuals rather than governmental or corporate institutions to trigger transformational change Readers will learn what they can do to most significantly transform their communities and the planet with more sustainable pathways

Transforming Development Practice and Environmental

Stewardship Ronald James Whitmore, 1998 A Green and Permanent Land Randal S. Beeman, James A. Pritchard, 2001

Once patronized primarily by the counterculture and the health food establishment the organic food industry today is a multi billion dollar business driven by ever growing consumer demand for safe food and greater public awareness of ecological issues Assumed by many to be a recent phenomenon that industry owes much to agricultural innovations that go back to the Dust Bowl era This book explores the roots and branches of alternative agricultural ideas in twentieth century America showing how ecological thought has challenged and changed agricultural theory practice and policy from the 1930s to the present It introduces us to the people and institutions who forged alternatives to industrialized agriculture through a deep concern for the enduring fertility of the soil a passionate commitment to human health and a strong advocacy of economic justice for farmers Randal Beeman and James Pritchard show that agricultural issues were central to the rise of the environmental movement in the United States As family farms failed during the Depression a new kind of agriculture was championed based on the holistic approach taught by the emerging science of ecology Ecology influenced the permanent agriculture movement that advocated such radical concepts as long term land use planning comprehensive soil conservation and organic farming Then in the 1970s sustainable agriculture combined many of these ideas with new concerns about misguided technology and an over consumptive culture to preach a more sensible approach to farming In chronicling the overlooked history of alternative agriculture A Green and Permanent Land records the significant contributions of individuals like Rex Tugwell Hugh Bennett Louis Bromfield Edward Faulkner Russell and Kate Lord Scott and Helen Nearing Robert Rodale Wes Jackson and groups like Friends of the Land and the Practical Farmers of Iowa And by demonstrating how agriculture also remains central to the public interest especially in the face of climatic crises genetically altered crops and questionable uses of pesticides this book puts these issues in historical perspective and offers readers considerable food for thought
