Stream Restoration in Dynamic Fluvial Systems Andrew Simon, Sean J. Bennett, Janine M. Castro, 2013-05-08 Published by the American Geophysical Union as part of the Geophysical Monograph Series Volume 194 Stream Restoration in Dynamic Fluvial Systems Scientific Approaches Analyses and Tools brings together leading contributors in stream restoration science to provide comprehensive consideration of process based approaches tools and applications of techniques useful for the implementation of sustainable restoration strategies Stream restoration is a catchall term for modifications to streams and adjacent riparian zones undertaken to improve geomorphic and or ecologic function structure and integrity of river corridors and it has become a multibillion dollar industry A vigorous debate currently exists in research and professional communities regarding the approaches applications and tools most effective in designing implementing and assessing stream restoration strategies given a multitude of goals objectives stakeholders and boundary conditions More importantly stream restoration as a research oriented academic discipline is at present lagging stream restoration as a rapidly evolving practitioner centric endeavor The volume addresses these main areas concepts in stream restoration river mechanics and the use of hydraulic structures modeling in restoration design ecology ecologic indices and habitat geomorphic approaches to stream and watershed management and sediment considerations in stream restoration Stream Restoration in Dynamic Fluvial Systems will appeal to scholars professionals and government agency and institute researchers involved in examining river flow processes river channel changes and improvements watershed processes and landscape systematics

Computational Fluid Dynamics Oleg Minin, Igor Minin, 2011-07-05 This book is planned to publish with an objective to provide a state of art reference book in the area of computational fluid dynamics for CFD engineers scientists applied physicists and post graduate students Also the aim of the book is the continuous and timely dissemination of new and innovative CFD research and developments This reference book is a collection of 14 chapters characterized in 4 parts modern principles of CFD CFD in physics industrial and in castle This book provides a comprehensive overview of the computational experiment technology numerical simulation of the hydrodynamics and heat transfer processes in a two dimensional gas application of lattice Boltzmann method in heat transfer and fluid flow etc Several interesting applications area are also discusses in the book like underwater vehicle propeller the flow behavior in gas cooled nuclear reactors simulation odour dispersion around windbreaks and so on

Biological Flow Modelling Suvash C. Saha, Akshoy Ranjan Paul, 2025-10-28 The book on Biological Flow Modelling is a pioneering exploration at the intersection of biomedical engineering and computational fluid dynamics It masterfully investigates into the complexities of bio fluid phenomena from intricate airway structures and cardiovascular biomechanics to advanced drug delivery systems and neurological fluid

dynamics By integrating cutting edge simulations and clinical insights it not only advances our understanding of physiological and pathological processes but also paves the way for innovative healthcare solutions This comprehensive anthology showcases authors collective expertise and vision offering readers a profound perspective on the dynamic interplay between fluids and biological systems

Intelligent Environments 2009 Victor Callaghan,Achilles Kameas,Angélica Reyes,Dolors Royo,2009-07-15 As computers are increasingly embedded into our everyday environments the objects therein become augmented with sensors processing and communication capabilities and novel interfaces The capability for objects to perceive the environment store and process data pursue goals reason about their intentions and coordinate actions in a holistic manner gives rise to the so called Intelligent Environment IE In such environments real space becomes augmented with digital content thus transcending the limits of nature and of human perception The result is a pervasive transparent infrastructure capable of recognizing responding and adapting to individuals in a seamless and unobtrusive way The realization of Intelligent Environments requires the convergence of different disciplines such as information and computer science building architecture material engineering artificial intelligence sociology art and design The 5th International Conference on Intelligent Environments IE 09 held at the Polytechnic University of Catalonia Castelldefels Barcelona Spain provides a multidisciplinary forum for researchers and engineers from across the world to present their latest research and to discuss future directions in the area of Intelligent Environments The IE 09 proceedings contain the complete conference program including full papers presented at special sessions and short papers from the doctoral colloquium and poster session In addition three thought provoking invited lectures on topics of current and future IE research are included

Proceedings of the ASME Turbo Expo ... ,2005 Gambit 2 ,2001 Research on Ship Design and Optimization Based on Simulation-Based Design (SBD) Technique Bao-Ji Zhang,Sheng-Long Zhang,2018-05-30 Ship optimization design is critical to the preliminary design of a ship With the rapid development of computer technology the simulation based design SBD technique has been introduced into the field of ship design Typical SBD consists of three parts geometric reconstruction CFD numerical simulation and optimization In the context of ship design these are used to alter the shape of the ship evaluate the objective function and to assess the hull form space respectively As such the SBD technique opens up new opportunities and paves the way for a new method for optimal ship design This book discusses the problem of optimizing ship s hulls highlighting the key technologies of ship optimization design and presenting a series of hull form optimization platforms It includes several improved approaches and novel ideas with significant potential in this field
