

Manually Adding a Product in Allscripts TouchWorks

Manually Adding

If you have chosen to prescribe an injectable product and it is not available in Allscripts TouchWorks, consider consulting your practice EHR IT support team to manually add it to the product list. Manually adding a new product will enable documentation of a sample or prescription in the EHR for future reference.

Adding a product as an Orderable Item:

1. Navigate to **Dictionaries** in the TW Admin menu
2. Select **Orderable Items**
3. Within **Orderable Items**, select **Medication and Pharmacy Supplies**
4. The **Medication Orderable Items** screen appears
5. Enter **Drug Name**
6. **Route of Admin:** Subcutaneous
7. Add **NDC**

Note: The required fields to add a new medication are NDC and Drug Name; other fields are optional.

Drug Interactions: Manually added medications are not validated for drug interactions, drug allergies, duplicate therapies or other potential adverse drug events, or formulary compliance.

Electronic Submission: Manually added medications are not able to be transmitted electronically to a pharmacy. The script must be printed and given to the patient or phoned into the pharmacy.

Database Management: When the comprehensive product listing from Allscripts TouchWorks is updated to include the added product, it is recommended to delete the manually added entries.

This resource is meant to serve as an overview only and should not replace detailed instructions provided to you by your internal or external EHR provider. Always refer or discuss any EHR questions with your practice EHR IT support team.

If you have product-related questions, please contact Novo Nordisk Medical Information: 1-833-457-7455 or NovoNordiskMedical.com.
