

DIRECT FLASH

Direct on-camera flash provides the least attractive lighting. It creates an ugly, hard shadow, burns out highlights and flattens the subject.

DIRECT OFF-CAMERA FLASH

Taking the flash off-camera and moving it to one side adds a little bit of depth and shrinks the shadow slightly, but the result is still unacceptably poor.

DIFFUSE OFF-CAMERA FLASH

Adding a diffuser to off-camera flash makes a big difference, visibly reducing the intensity of the shadow and creating softer, more-even lighting.

NON-DIFFUSED BOUNCE FLASH

Tilting the flash head up to 60° position and bouncing the flash off the ceiling shows an even bigger improvement than diffused off-camera flash.

DIFFUSED BOUNCE FLASH

Here the flash is bounced and diffused creating an extremely soft, diffused effect and an even dimmer shadow. However, the eyes look a bit lifeless.

DIFFUSED BOUNCE CARD FLASH

Here the flash is bounced with the wide-angle diffuser in place. The bounce-card is also used to add a brighter catchlight for a more lively result.
